Sex: F

Rabies Given: 10/28/2014
Due: 10/27/2016

Rabies#: 145220

Periodic examinations and annual boosters help maintain your pet's resistance to disease.

The Palmyra Animal Clinic uses Rabvac 3 Fort Dodge Rabies Vaccine. The vaccine has a three (3) year manufacturer's duration but we recommend repeating it every two (2) years due to the occurrence of rabies in this area and to prevent large fines if you should fail to repeat it timely and become overdue.
